Need more community owned or managed open spaces, particualy away from Martlesham Heath
More accessible county areas needed close by, eg; Dr Brittain's Woods
Do not have higher density housing. High density housing can lead to more neighbourhood tension.
Adequate gardens and open spaces are known to improve living conditions and generally 'happier'
No gravel surfaces. Dangerous for cyclists when falling off and ice up in bad weather and gravel spreads
Protect open spaces on Martlesham Heath
Traffic Lights impede traffic flow and increase noise and pollution.
Small incidents at nearby junctions cause regular overload of existing roads
No increase in Air and Noise pollution from A12
We need to reserve land for a Graveyard. Sy Mary's edxtension is filling fast.
No Wind Turbines Use Solar panels Tree lined residential housing Within blocks of flats use collective recycling and ONE satellite dish for the block so it looks more attractive
Please keep SSSI protected as it's a nice place for a walk and a place to 'feel' history, And I guess many children like the area and especially the runway. nb. comment from teenage German visitor.
Noise from ' motocross ' at Brightwell
Noise from Police Sirens on A12
Good footway surfaces are important for the infirm and we are all going that way. So tarmac not flagstones for example.
More trees and bushes about the place helps in many ways, air quality, visual appeal, noise reduction. Perhaps some more soecimen trees in the open spaces on Martlesham Heath?
